# 1265 Black

## Bias Weave Varnished Cambric Cloth and Tape For Class A (105°C) Application

### Application of 1265 Black

Bedford Materials 1265 cloth and tape uses a fine bias (diagonal) weave cotton cloth impregnated with an electrical insulating varnish. Bias cut varnished cambric is a Class A (105°C) insulation which has the advantages of conformity and elongation. It conforms tightly to irregular shapes and surfaces to give a snug insulative wrapping for use on armature coils, motors, transformers, bus bars, cable joints, and similar applications.

### Advantages

**High Electrical Strength:** 1000 volts per mil or higher.

**Good Elongated Properties:** Varnish coating on bias weave cambric is extremely flexible for wrapping tightly over uneven surfaces, around corners, and over variable contours, eliminating air pockets and irregularities.

**Meets requirements of MIL-I-3374,** Type I and II, Class 1.

**Good oil and moisture resistance.**

**Good slippage:** Assured by light oil finish on surface of tape.

### Specifications (Typical Values)

Nominal Thickness (Inches).....	0.007	0.010	0.012	0.015
Weight, Approximate (lbs./sq. yd.).....	0.40	0.55	0.65	0.80
<sup>1</sup> Tensile Strength (lbs./in. of width).....	40	40	40	40
<sup>2</sup> Elongation, 6lbs. (%).....	3	6	6	6
Average Breakdown, ¼ in. Dia. Electrodes, Short				
Time Test (volts/mil thickness).....	1,150	1,150	1,100	1,100
Color.....	Black with light oil finish.			
	Other finishes available on negotiation.			
Standard Core Size, Tape.....	1 inch ID. 3/8 inch Id core available on request.			
Standard Core Size, 36 inch Cloth.....	←----- 2 inch ID -----→			
Also available dry-packed or in oil to customer specification.				

<sup>1</sup> - Obtained on Scott Tester of the dead weight pendulum type.

<sup>2</sup> - ASTM-D-295.

### Ordering Information

Tape is furnished in standard roll lengths of 36 and 72 yards. Non-standard lengths and oil packing quoted on request. Standard tape packed in waterproof packages approximately 10-11 inches long.

Specify dry or oily finish.

Specify thickness, width and length of tape wanted.

# 1266 Tan

## Bias Weave Varnished Cambric Cloth and Tape For Class A (105°C) Application

### Application of 1266 Tan

Bedford Materials 1266 cloth and tape uses a fine bias (diagonal) weave cotton cloth impregnated with an electrical insulating varnish. Bias cut varnished cambric is a Class A (105°C) insulation which has the advantages of conformity and elongation. It conforms tightly to irregular shapes and surfaces to give a snug insulative wrapping for use on armature coils, motors, transformers, bus bars, cable joints, and similar applications.

### Advantages

**High Electrical Strength:** 1000 volts per mil or higher.

**Good Elongated Properties:** Varnish coating on bias weave cambric is extremely flexible for wrapping tightly over uneven surfaces, around corners, and over variable contours, eliminating air pockets and irregularities.

**Meets requirements of MIL-I-3374,** Type I and II, Class 1.

**Good oil and moisture resistance.**

**Good slippage:** Assured by light paraffin coat on surface of tape.
